

VEITH SYSTEM

VEITH-PIN-TABLE for matching checks, stripes and patterns

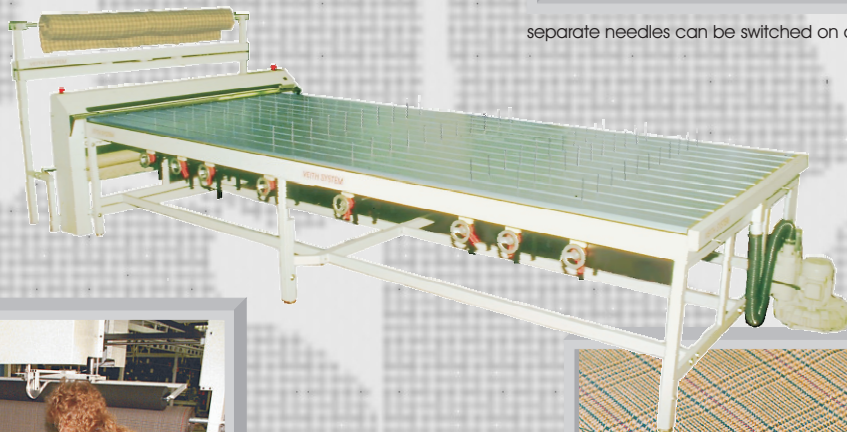

high efficient spreading and matching of woven fabrics - the integrating solution
from marker making over spreading to cutting

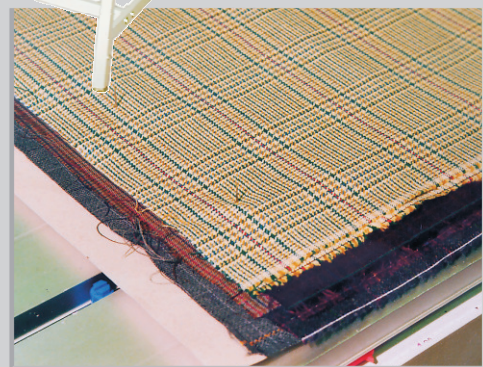

the needle bars are positioned according to the marker

separate needles can be switched on and off

spreading the fabric and matching it in one step

often different checks can be spread at the same time

the finished lay package is fixed by the VEITH Needle Plates

for cutting a CNC-Cutter can be used

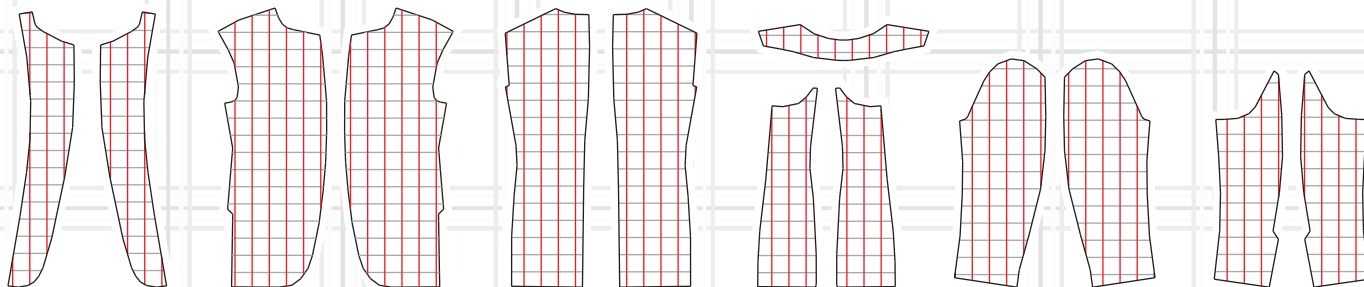

VEITH SYSTEM

VEITH SYSTEM - THE POWERFUL CHECK SYSTEM

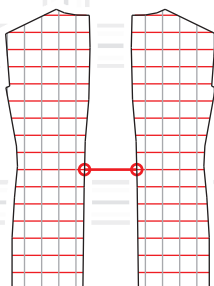

The example of a high quality men's jacket will illustrate the capability of the **VEITH PIN TABLE SYSTEM**:

Using the **VEITH PIN TABLE** the following matching conditions will be fulfilled:

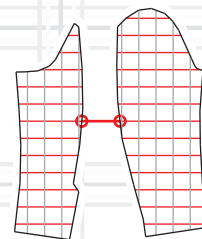

- ✓ all pieces are symmetrical

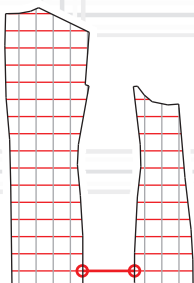

- ✓ both backs are matched together

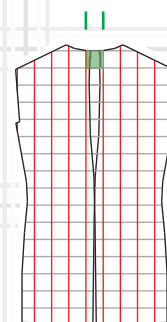

- ✓ under sleeve matched to upper sleeve

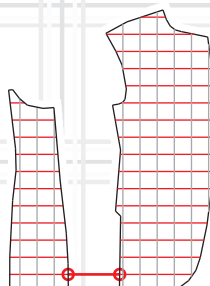

- ✓ side panel matched to back

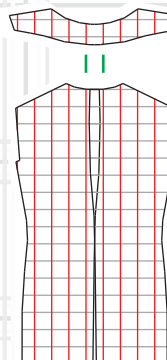

- ✓ full repeat of a check in the center of the back at any desired position

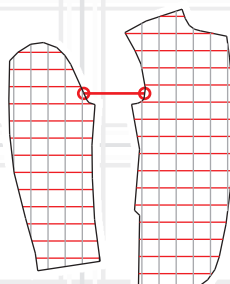

- ✓ front matched to side panel

- ✓ collar matched to back

- ✓ upper sleeve matched to front

VEITH SYSTEM goes GREEN
We have installed a photo-voltaic system, generating over the year 35% more electric energy than we consume during the same period.

- ★ all of the above matching conditions are fulfilled even if different sizes of checks are spread in the same lay
- ★ after spreading the lay can immediately be net cut – manually or by an automatic cutter; no blocking – no relaying

COMPETENCE IN MATCHING CHECKS AND STRIPES
