

VEITH SYSTEM

Needle plates

PROBLEM ▶

SOLUTION ▶

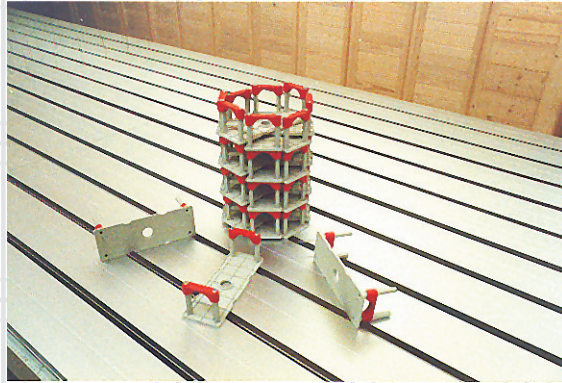

ADVANTAGES ▶

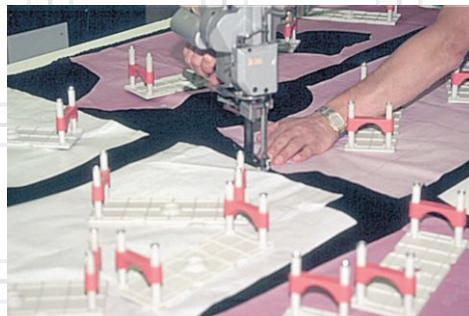

- X A pile of several layers of fabric typically tend to shift
- X Traditional clamps can hold the pile just at the edge, but not inside the lay package
- X Traditional clamps press the pile with the consequence that layers shift slightly close to the clamp
- X The quality of the cut pieces is not accurate
- X Cutting itself takes more time

- ★ The VEITH SYSTEM Needle Plate is a clamping tool with pins coming from the top
- ★ 2 bridges (red) holding each 2 pins(*) and sliding up and down a guide
- ★ A clever design makes sure that the not used Needle Plates can be stored in an easy to handle tower

- ✓ No pressure on the fabric, consequence no shifting of the plies
- ✓ Protect the lay package also in the centre area of the lay package
- ✓ Easy and fast to handle
- ✓ Improve your quality

The VEITH Needle plates and the spare needles are available in the following packing units:

- VEITH Needle Plate, 12 pieces per pack, article no: **STOLK**
 - VEITH Spare Needles for STOLK, 10 pieces per pack, article no: **ENSTO**
- (*) pin length : 45 mm - pin diameter: 1mm

VEITH SYSTEM goes GREEN
We have installed a photo-voltaic system, generating over the year 35% more electric energy than we consume during the same period.

COMPETENCE IN MATCHING CHECKS AND STRIPES
